Consultation services

Our team of technical and intellectual property professionals offers various analysis services based on extensive data and unique perspectives. We provide a diverse lineup of services to meet your specific needs. Here are some examples of custom reports that analyze patent information from various perspectives.

◆ Industry Structure Analysis

◆ Technology Structure Analysis

◆ YK Value Analysis

◆ Patent Impact & Application Efficiency Analysis

* YK Value... A technology competitiveness index derived from the analysis of technical information and patents developed by our firm.

PATWARE

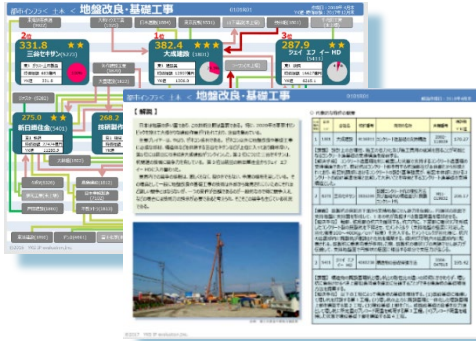

PATWARE is a system that evaluates the value of patents held by companies using YK Value and YK3 Value. YK Value and YK3 Value are indicators of technological competitiveness and have been found to have economic significance. Specifically, these values can serve as leading indicators of company revenue, stock prices, and even defaults. By utilizing these economically significant indicators to execute an IP landscape, it is believed that effective strategic planning for companies can be achieved, allowing for the establishment of economically meaningful future prospects.

* YK3 Value is an indicator developed by our firm to measure the level of focus or investment by patent holders on their patents.
